

SYED AMMAR HUSSAIN SHAH

Software Engineer | Machine Learning & Data Science

Leeds, UK | kazmi82033@gmail.com | +44 7887 485348 | GitHub: [kazmi017](#) | LinkedIn: [Syed Ammar Hussain](#)

PROFESSIONAL SUMMARY

Software engineer with an MSc in Computer Science and Technology (Commendation, Ulster University), experienced in machine learning and application development. Built an ML pipeline comparing five models (97% best accuracy), and delivered software for a live, accuracy-critical hospital system. Seeking machine learning, data science and AI engineering roles, including Knowledge Transfer Partnerships.

TECHNICAL SKILLS

Machine Learning & Data: Python, pandas, NumPy, scikit-learn, Random Forest, Gradient Boosting, SVM, KNN, Naive Bayes, K-Means, Matplotlib, SQL; Deep Learning and Knowledge Engineering (MSc modules)
Development: JavaScript, Java, C++, React.js, Next.js, Node.js, Django, Redux Toolkit, Flutter, Kotlin, API integration
Tools: Git, AWS (S3), OVHcloud, Docker and FastAPI

RESEARCH EXPERIENCE

Personalised Career Recommendation System | MSc Dissertation, Ulster University2024 – 2025

- Built an end-to-end Python ML pipeline (cleaning, feature selection, standardisation) on a 1,200-row, 17-class dataset, using K-Means clustering to group profiles.
- Compared 5 classifiers on accuracy, precision, recall, F1 and confusion matrix; Random Forest was best at 97% accuracy.

WORK EXPERIENCE

Software Developer | Shifa International Hospital Ltd.Sep 2023 – Jan 2024

- Worked on a live, patient-facing medical emergency system in a hospital tech team, where accuracy was critical.
- Analysed a legacy Oracle system and translated its business logic into requirements for the new platform.
- Built the Node.js and React.js application layer for the migration, alongside the database team.

React.js Developer | WhizpoolJul 2022 – Aug 2023

- Built an image-watermarking web app (Canvas, compression, batch templating) and a bike-rental app with live location tracking and geofencing via the Google Maps API.
- Fixed front-end performance issues across devices.

React.js Intern | DecaSoftDec 2021 – Mar 2022

- Converted Figma designs into React UI (Material UI, Bootstrap) and implemented state management with Redux Toolkit.

EDUCATION

MSc Computer Science and Technology (Commendation) | Ulster University, UK2025

Modules: Data Science & Machine Learning, Deep Learning, Knowledge Engineering, Big Data & Infrastructure

BS Software Engineering | COMSATS University Islamabad, Pakistan2022

Modules: Machine Learning, Artificial Intelligence, Data Warehousing & Data Mining, Data Structures & Algorithms
